INDIAN SCHOOL AL GHUBRA

21 September 2022

Circular for students of classes 3 to 9

Dear Parents,

The school has partnered with Super Al Polaris, a research-based organization, who have the expertise in Artificial Intelligence, Machine Learning, Coding and Applied Artificial Intelligence,

They will be offering classes in Design and Innovative Technology in our school from the 1st October 2022 on every Sunday for an hour in the evening (from 4pm onwards). There will be several batches depending on the number of students who choose to take this extra course.

A certificate will be awarded to each child on completion of this course. There will be 25 classes starting from 1st October 2022 and the course fee is 70 OMR which may be paid in two installments (35 OMR in October 2022 and 35 OMR in January 2023) which may be paid at the school office counter.

The goal is to provide students with a solid foundation in STEM (Science, Technology, Engineering, and Math) and enable thinking abilities to prepare them with 21st-century skills for their degrees and careers. These lessons not only make it easy for students to understand abstract programming concepts but also allow them to apply concepts to different projects, games, web technology and the development of apps.

Our aim is to make our children future ready for we want them to join the 21st -century learning revolution. This course will help them to improve their critical thinking and problem-solving skills and it also helps them to develop their creativity and writing skills. Coding and AI which is a part of the course will help them in the future to choose their career goal.

Please register your child by paying the course fee for the seats are limited.

You may contact Mr. Bejoy Kurian (Career Counsellor) counsellor@indianschool.com if you have any queries.

Best wishes

Principal
